

Samsung LCD TV – LA32R81B

HD ready 1366 x 768 resolution

The SAMSUNG HDTV technology broadcasts and displays TV programmes with crystal clear images as bright as reality. HD-ready TVs offer picture resolution that is at least 2 times superior to analogue TV. Combined with digital surround sound, it provides a cinematic experience.

Distinctive design

SAMSUNG bordeaux LCD TV has an elegant v-curve, inspired by the stylish grace of the shapely figure of a wine glass. It is crafted with high gloss coating throughout its figure and its graceful lines can be appreciated from any angle.

Movie plus visual precision

You can enjoy fast action without judder you that find on standard LCD TVs. The films and videos are shot at 24, 25 or 30 frames per seconds, but TVs use more frames. Conventional TVs insert two or three identical frames, that causes judder with fast action. Whereas, SAMSUNG movie plus calculates the motion component of the incoming video signal and alters the action to create new frames without judder effect.

Wide colour enhancer

With SAMSUNG wide colour enhancer, you can see the colours that are weakened in the standard LCD TVs. You can now experience the beauty of a blue summer sky and the fresh green of the grass in the spring.
